SUMMARY

MCA graduate with strong skills in Java, SQL, and web development. Experienced in building full-stack applications and solving real-world problems. Eager to start my career as a Software Developer and contribute to dynamic tech teams.

PROJECT

E-Commerce Website   **2 months**

The Pizza E-Commerce Website is a dynamic and easy-to-use online platform where users can explore, personalize, and order pizzas. Developed with HTML, CSS, and JavaScript, the project offers an attractive interface and real-time features to deliver a seamless and engaging user experience.

Car Showroom Management System   **4 months**

Developed a Car Showroom Management System using React.js , Java , and Oracle. Built features like car browsing, test drive booking, service scheduling, and an admin dashboard for inventory and appointments. Strengthened full-stack development skills and gained practical experience in handling real-world business operations.

Online Blood Bank Management System   **1 month**

Developed an Online Blood Bank Management System using SQL for efficient donor and blood inventory tracking. Designed relational databases, optimized queries, and implemented data integrity measures. Strengthened database management and real-world data handling skills.
